### Dimensions in Inches

#### Single Access Door
- **Access Doors**: (A) Horizontal Single Access Doors
  - **Model**: 33820 (TR) Select
  - **Series**: 14½" h x 22¼" w x 22 d
- **Vertical Single Access Doors**: (B) Double Doors
  - **Model**: 33820 (TR) Select
  - **Series**: 14½" h x 22¼" w x 22 d

#### Double Access Doors
- **Model**: 33820 (TR) Select
  - **Series**: 14½" h x 22¼" w x 22 d

#### Warming Drawer
- **Model**: 53830SC†
- **Series**: 12¼" h x 32¼" w x 22 d

### Outdoor Kitchen Considerations
- **Combustible grill & accessories required:**
- **Combustible construction required insulating layer:**
- **Select Natural or Propane (LP) gas:**
- **Determine total gas consumption for supply line size:**
- **Access is required to gas connections and shut-off valve:**
- **Plan location of proper venting from grill and appliances:**
- **Always refer to the installation and operating instructions of your FireMagic® grill and/or accessories for installation guidelines & safety warnings, before starting your project:**
- **Always check all gas connections for leaks:**
- **Provide ventilation in island for gas vapor. Allow at least four ventilation spaces at normal height and least 15" above floor if all at opposite ends/sides:**

### Location
- **Identify outdoor area where grill will be installed:**
- **Determine the utility needed (gas, water, electricity, drainage, etc.)**
- **Consider element exposure (sun, wind, direction*, weather, etc.)** *Wind blowing into or across the rear oven/dam can cause poor performance and/or dangerous overheating. Orient the grill so that the prevailing wind blows toward the front of the grill.*

### Materials
- **Grill-top - tile, granite, marble, concrete:**
- **Base - brick, stone, stucco, concrete:**
- **Combustible surrounds - (See page 6):**

### Notes
1. **There is a hanger on three sides of each grill. You must allow clearance for the hanger (SEE DETAIL 1).**
2. **The control panel (face) of the grills is wider than the cutout width. This conceals the cutout space on the left & right hand sides.**
3. **Clearance of 10" on each side of the oven is recommended for unrestricted operation of lid and rotisserie and at least 3" at the rear flange for ease of maintenance and proper operation. (10" from combustible surroundings on each side and rear is required).**
4. **Insulating liners must be used & are available for combustible surrounds. (See page 6).**
5. **The rotisserie motor on all models is located on the right side of the grill. Optional Rearview Brackets are available to mount rotisserie motor on opposite side. ONLY units ordered with back burner option come with rotisserie kit and brackets.**
